    <h1>Revolutionizing Liver Care</h1>
    <p>Predicting Liver Cirrhosis Using Advanced Machine Learning Techniques</p>
</header>

<div class="container">
    <h2>About the Project</h2>
    <p>
        This project aims to transform liver disease diagnostics by applying cutting-edge
        machine learning techniques to predict liver cirrhosis at early stages. By analyzing patient health
        data, the model can assist doctors in making faster, more accurate decisions.
    </p>

    <h2>Key Features</h2>
    <ul>
        <li>Data-driven diagnosis support</li>
        <li>Machine learning model trained on real patient datasets</li>
        <li>User-friendly interface for predictions</li>
    </ul>

    <div class="team">
        <h2>Team Members</h2>
        <p><span class="highlight">Team ID:</span> LTVIP2025TMID44575</p>
        <ul>
            <li>Tirupati Sravanthi</li>
            <li>Udathala Neelavathi</li>
            <li>Tanneru Nagendra</li>
            <li>Sirisha Polla</li>
        </ul>
    </div>

    <h2>Conclusion</h2>
    <p>
```

Our solution demonstrates the powerful potential of AI in healthcare. By accurately predicting liver cirrhosis, this project can lead to earlier interventions and improved patient outcomes.
